Monitoring Data Record

Project Title: NC 16 in Lucia (R-2206A)	COE Action ID: <u>200031430</u>
Stream Name: <u>unnamed tributary to the Catawba River</u>	DWQ Number: 001232
City, County and other Location Information: Sta. 6+60 Ramp	
Date Construction Completed: N/A	Monitoring Year: (5) of 5
Ecoregion: 8 digit HUC unit	03050101
USGS Quad Name and Coordinates:	
Rosgen Classification:	
Length of Project: 738' Urban or Rural: Rural	Watershed Size:
Monitoring DATA collected by: M. Green, J. Young	Date: <u>9/3/08</u>
Applicant Information:	
Name: NCDOT Roadside Environmental Unit	
Address: 1425 Rock Quarry Road Raleigh, NC 276	10
Telephone Number: (919) 861-3772 Email a	ddress: mlgreen@dot.state.nc.us
Consultant Information:	
Name:	
Address:	
Telephone Number: Email a	ddress:
Project Status: <u>Complete</u>	
	401 Cert.): Level (1)2 3
Monitoring Level 1 requires completion of <i>Section 1, Section 2</i> Permit States : NCDOT shall perform the following composeach year for the 5 year monitoring period (summer and survival, and visual inspection of channel stability. If less that the first 5 years, NCDOT shall continue monitoring undocumented. The bankfull events must occur during separate the required bankfull events do not occur during the 5 year monitoring with resource agencies, may determine that further	ments of Level I monitoring twice winter): Reference photos, plant in two bankfull events occur during til the second bankfull event is monitoring years. In the event that monitoring period, the USACE, in
Section 1. <u>PHOTO REFERENCE SITES</u> (Monitoring at all levels must complete this section)	
Total number of reference photo locations at this site: 8 ref	ference points
Dates reference photos have been taken at this site: <u>5/20/04</u> 7/18/06, 1/30/07, 8/21/07, 2/6/08, 9/3/08	4, 11/2/04, 5/23/05, 2/8/06,
	_
Individual from whom additional photos can be obtained (name, address, phone):
Other Information relative to site photo reference: A site map this report.	with photo point locations is attached with

If required to complete Level 3 monitoring only stop here; otherwise, complete section 2.

Attach plan sheet indicating reference photos. Identify specific problem areas (missing, stressed, damaged or dead plantings): Estimated causes, and proposed/required remedial action: ADDITIONAL COMMENTS: Hardwood vegetation noted onsite includes: sweetgum, northern red oak, tulip poplar, overcup oak, mimosa, river birch, black willow, tag alder, silky dogwood, and sycamore. Other vegetation onsite included: Juncus sp., fennel, lespedeza, horse-neetle, sedge, briars, jewelweed, and various grasses.

Section 2. PLANT SURVIVAL

If required to complete Level 1 and Level 2 monitoring only stop here; otherwise, complete section 3.

Section 3. CHANNEL STABILITY

Visual Inspection: The entire stream project as well as each in-stream structure and bank stabilization/revetment structure must be evaluated and problems addressed.

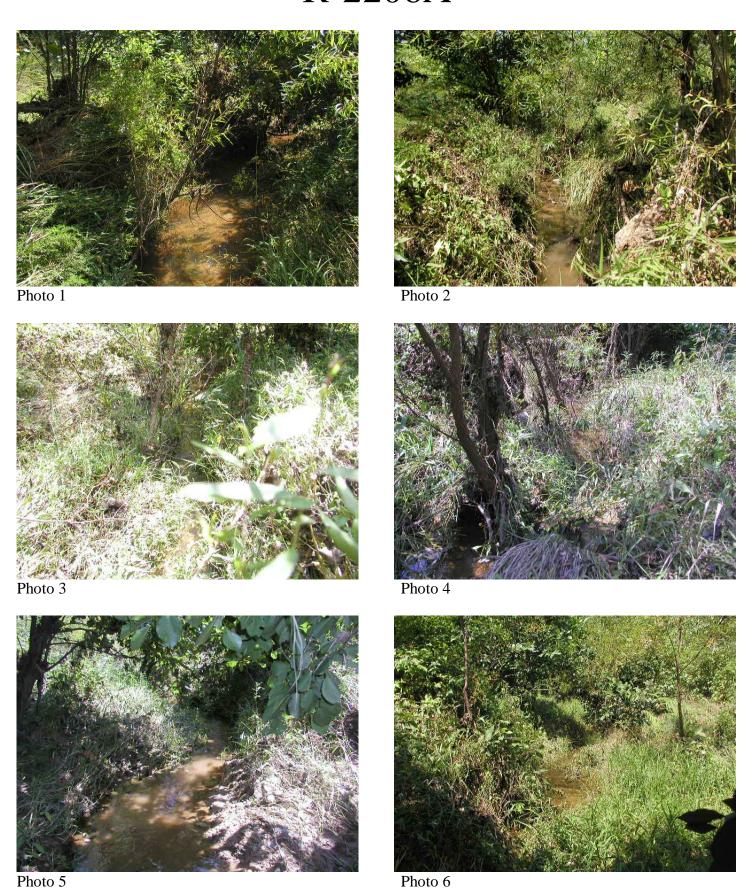

Report on the visual inspection of channel stability. Physical measurements of channel

stability/morphology will not be required. Include a discussion of any deviations from as-built
and an evaluation of the significance of these deviations and whether they are indicative of a
stabilizing or destabilizing situation.
The channel is stable throughout the entire onsite stream relocation. A bankfull event has occurred since the last
monitoring. NCDOT will continue to monitor the UT to the Catawba River stream relocation.

structure?					
Head cut or					
down cut					
present?					
Bank or scour					
erosion					
present?					

NOTE: Attach separate narrative sheets to each monitoring report describing/discussing the overall monitoring results. Include the identification of specific problem areas/channel failures, estimated cause and proposed/required remedial action. This should include a brief discussion of any parameter that has changed significantly from as-built.
